EXPERIENCE

Full Stack Developer Intern

NullClass Technology

December 2023 - March 2024, Bengaluru, Karnataka, India

- Worked at Nullclass Technology as a full stack developer intern.
- Responsibilities included developing and maintaining both front-end and back-end components of web applications.
- Gained practical experience in various programming languages and frameworks.
- Adapted to remote work environment, utilizing various communication tools to stay connected with the team.

PROJECTS

Blog-App ([Link](#))

June 2024 - July 2024

- Engineered a responsive blog application using the MERN stack (MongoDB, Express.js, React, Node.js) with Tailwind CSS for modern UI design.
- Implemented secure user authentication and authorization with Firebase and Google Authentication, ensuring seamless and safe user experiences.
- Optimized backend processes with Node.js and Express.js, improving data handling and server response times for a scalable and efficient application.
- Designed and developed RESTful APIs with Express.js for efficient data retrieval and manipulation, facilitating smooth interaction between the frontend and backend.

E-COMMERCE APP (Flipkart Clone)

March 2024 - March 2024

- Developed a Flipkart clone using MERN technology.
- Created front-end with React for dynamic user interfaces.
- Developed reusable React components to streamline development and ensure consistency across the application.
- Engineered a dynamic product search and filter feature to improve user navigation and experience.
- Implemented back-end with Node.js and Express for server-side logic.
- Developed shopping cart functionality with add, remove, and update options.
- Incorporated error handling and validation on both client and server sides.

IMDB-Clone (Movie App)

February 2024 - February 2024

- Developed IMDB clone using JavaScript and React.
- Utilized API fetching for retrieving movie and TV show data.
- Implemented features for browsing and displaying movie details.
- Enabled smooth navigation between pages with React Router.

File Sharing App

February 2024 - February 2024

- Engineered a modern file sharing platform with HTML, CSS, and JavaScript, utilizing React for dynamic user interfaces.
- Implemented robust backend functionality with Node.js and Express.js to manage file uploads and downloads.
- Incorporated MongoDB as the primary database solution, leveraging Mongoose for efficient data modeling and interaction.

SKILLS

Front End: HTML, CSS, Material UI, React, JavaScript, Redux Toolkit.

Back End: Node.js, Express.js, JAVA , C++, Python.

Database: MongoDB, Mongoose.

Other Skills: Rest-API, Axios, CORS .

EDUCATION

Master's in Computer Applications

Bachelor of Computer Applications
